

A-Class pumps from Wilo.  
1st-Class energy savings.

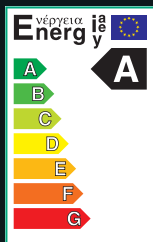

Product launch information.

**NEW!**

# The Wilo-Smart A energy-saving pump.

Energy efficiency class A with standard operation.

## The new standard at Wilo.

Thanks to its electronic control system and the latest motor and hydraulics technology, the Wilo-Smart A has impressive energy savings of up to 70 %. In addition to use in heating systems, the A-class pump is also suitable for floor heating systems and air-conditioning systems – a wider range of application than that of any standard pump. It has only one thing in common with a standard pump: simple handling.

## Simply ingenious: the Wilo quick connection.

The intelligent inner workings of the Wilo-Smart A are incredibly clever. Connection is extremely simple – thanks to the Wilo quick connection, the Wilo-Smart is ready for action in just a few steps. You won't even need a screwdriver! Suitable for cable thicknesses of up to 2.5 mm.

## Simple setting.

Setting the Wilo-Smart A is really easy too, using three programs preset at the factory. And thanks to the preset control range, flow noises are a thing of the past with the Wilo-Smart A.

With energy cost savings of up to 70 % compared to standard pumps, your investment in energy efficiency class A will soon pay off.

With a few simple actions, the Wilo-Smart is ready for operation and suitable for cable thicknesses up to 2.5 mm.

Depending on the size of the building, the intelligent electronics of the Wilo-Smart A adjust their output and, thus their energy consumption, to demand.

# Wilo-Stratos PICO high-efficiency pump.

## Technical data.

### Wilo-Stratos PICO

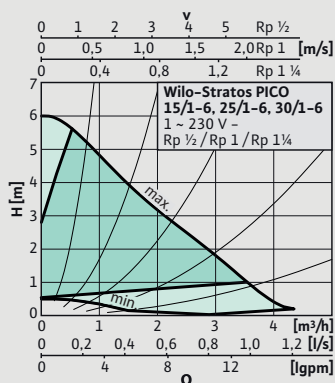

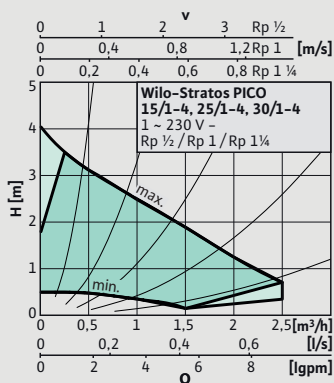

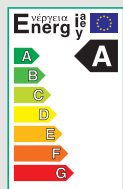

#### Field of applications

Hot water heating systems of all types in detached and semi-detached houses, air conditioning applications, industrial circulation systems

#### User benefits

- High-efficiency pump for energy saving, rated energy efficiency class A
- Reliable starting and maximum convenience due to high starting torque and deblocking software
- Simple to set up, quick to install
- Display with consumption reading
- Thermal insulation shell for heating applications as standard

# The Wilo-Smart A energy-saving pump.

## Technical data.

### Wilo-Smart A

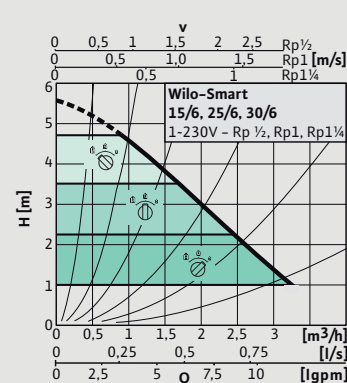

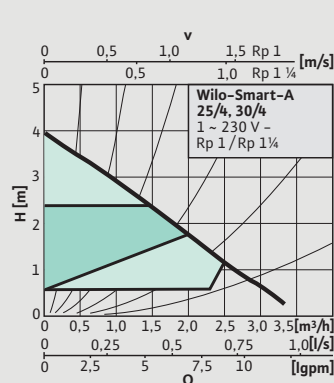

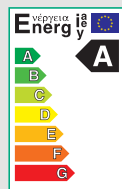

#### Field of applications

All hot water heating systems, floor heating systems and air conditioning

#### User benefits

- Filter and deblocking software for a reliable start
- Rated energy efficiency class A
- Simple to set up, quick to install
- Flexible field of applications (+2°C to +95°C)

The Wilo-Smart 25/6 and 30/6 are classified energy efficiency class B.
